

SUMMER 2017 SUMMER MATH AND READING ASSIGNMENTS

The following is an overview of your child's required math and reading assignments for the summer months. Please see the assignment sheets for each grade level, posted on our website, for a more detailed summary of summer assignments.

SUMMER IXL MATH ASSIGNMENTS

Every child who is entering grades 2 – 8 in the fall will be expected to complete a series of IXL math exercises. Please note that, unless otherwise indicated, the exercises are to be completed at the grade level your child is now finishing. Students should work until they have received a Smart Score of 80. As you will notice, some of the skills must be completed by June 30th and the remaining skills by July 31st. Your child's current math teacher will be monitoring this site during the summer, however, it is your child's responsibility to complete the assignments. Successful completion of these exercises in grades 5-8 will be counted as a first quarter grade. Progress will be monitored and noted for students in grades 2-4.

SUMMER READING ASSIGNMENTS

Every child who is entering grades 1 – 8 in the fall will be expected to complete a summer reading assignment. Upon completion of each book, students in grades 2 – 8 are asked to complete the fiction and non-fiction book report forms also found on our website. These completed forms **must be submitted by Monday, August 28th**. Please note that separate requirements for students entering grade 1 are noted on their assignment sheet.

Book reports will count as a first quarter reading grade. Students in grades 5-8 will be graded using the rubric found with the summer reading assignments.

We are confident that the summer math and reading assignments will help our students to keep their skills fresh, but will also allow plenty of time to relax and refresh during the summer months.

Have a great summer!
